Medical terms are used in the field of medicine, and clinical settings. This section deals with med terms that begin with the letter S, and features prefixes and adjectives in medical terminology. This section was developed for the speed learning of medical terminology. Start by revising the concepts for a block of medical terms, and then go back and select a previous term randomly and try to recall the meaning of that particular medical term before hovering over the term to determine the response. These frequent mini-tests will speed up the learning process and in a relatively short time, you will be able to quickly recall the meaning of all mentioned medical terms. This method of learning is superior to flash cards because of frequent exposure and testing of your recall. sacchar/o sacr sugar/o salping bag/o bugle; acoustic (eustachian) tube -salpinx trumpet; oviduct sangu/i blood sanit/a sapr/o health rotten, rotten flesh sarc/o (connective tissue) scapu/o scapula; scapula -slit for shale split/separation, slit sili/split sinistr/o left scirr/h/i spark scirr/h/o hard scler/o scler (white of the eye) -hardening scolec/o worm scol/o crooked. bent -scope instrument for visual examination -scopy optical examination scot/o dark seb/o sebum sebum/o sebum heresy/o for cutting semi-half semi/i sperm; seed -sepsis putrefaction seps/o infection sept/o partition ser/o serum, serous seven hepta-, sept-, septi-sial/o salor sialaden/o salivary gland sider/o sigmoid iron sigmoid/o sigmoid upper and lower end silic/o bay glass/o sinus -sis state; state sit / o food six hex-, hexa-, sex-skeleton/o skeleton -sol solution somat / o body -some body somn / o sleep -somnia sleeping son / o sound -spadia to tear; cut span / o meager, rarely -spasm sudden contraction of muscles spectr / o image, sperm spectrum / o spermatozoa; spermatozoa/o spermatozoa; sperm wedge spheno/o; wedge-shaped bone spher/o. round sphygm/o pulse -sphyxia pulse splanchn/o innards (internal organs) spin/o column (backbone) spir/o to breathe splen/o spleen spondyl/o vertebra /o vertebra (backbone) squam/o scale -stamping contraction staped/o stapes (middle ear bone) staphylose/o clusters; uvula -stable fixed, stable -stamping contraction staped /o stapes -stop to stop; control; insert -stat device/instrument to maintain something something -static for stopping, controlling steat/o fat; sten/o narrowed sebum, contraction -tightening; stenosis ster / o solid structure; steroid ère / o solid? 3D stern/sternum (sternum) steth/o chest -sthenia strength stich/o series spotted/o signal, point -stital to set; concerning the state of the new opening of the mouth -mouth (to form mouth) strept/o twisted chains -layer supporting tissue of a pole or sub-stake of an organ or sub- under the mouth; under submanchus/o lower jaw (lower jaw bone) succ/o juice sud/o sweat super-over, over sedation to stop supra-above; over sym-together? with symptom / o appearance syn-together; with concluding/o, synapt/o contact point, to join syncop/o to be cut off, cut sharply; faint syndesm/o synov/ o synovia link; articular membrane. case around a tendon syring / o tube system / o systol system / o contraction Check out the following resources to support learning and understanding of roots, patches and prefixes in medical terminology: Also found in: Dictionary, Wikipedia.
